

### GOAL

Under the guidance of Roosa Ruuti and Topi Teräsvilla, check and implement safety procedures at an open pit before and after blasting.

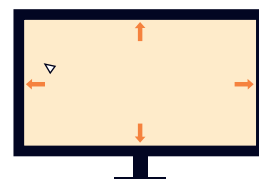

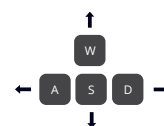

### MOVING

The camera moves when you move the cursor to the edges of the screen in the desired direction or by pressing the arrow keys (or asdw) on the keyboard.

You can speed up by pressing SHIFT at the same time.

### PLAYING

Hover your course over different objects and click on the ones that glow. Choose the correct answer by clicking. The cursor changes according to the answer to correspond to the correct action. You can move objects by clicking and dragging them.

SPEED UP: SHIFT

### CHANGE THE VIEW POINT

The view angle is changed either by keeping the middle mouse wheel pressed down or by pressing ALT + left mouse button while moving the mouse in the desired direction.

ALT

By rotating the mouse wheel you can zoom in and out.
