

Download and install instructions for the game exercises

Downloading and installing a PC / VR game

Click on the download link on the website and open the downloaded file. You must have a program that can open .zip files (e.g. WinZip or WinRAR).

The file can now be found in the downloads-folder from your computer. We recommend that you open the .zip file and move the game folder inside it to elsewhere (for example, on your desktop).

BlastingSafety.zip (evaluation copy)							
File Commands Tools Favorites Options Help

Name	Size	Packed	Туре				
BlastingSafety	477 591 209	158 449 922	File folder File folder				

When you open the folder, you will see many files inside it. It is important that you will not edit or delete any files, because the game uses data inside the folder.

You can play the game by double-clicking the .exe application, which is usually named in English according to the game. Note that the folder and file view may be different on your computer.

Windows may ask for network permission when you open the application. You can authorize the application and use it safely.

DOWNLOAD FOR VR (RIFT)

The file can now be found in the downloaded files on your phone as an .apk extension. When you open the application, your phone may ask for authorized license. Grant a permission. Note that for different phones, you may need to enter the license manually from the settings.

The app should appear on your phone's desktop. If it does not appear there, you can search for it in your applications by the name of the installation file.

You can now play the game.
