MANUAL SAFETY CARD

MOBILE, VR

MOVING IN VR

Teleport by spinning the right side thumbstick. Glowing place indicates where you are about to move to. You can change the direction and the distance by moving and rotating the controller. Once you are happy with the place, free the thumbstick.

By changing your moving type, you can also move manually by controlling the thumbstick.

You can open the Tablet by holding down the left side trigger (under your index finger). Scroll up and down with the leftside thumbstick.

By pushing the rightside trigger, you can check and select.

THE GOAL

Open the tablet (Workcard). Examine the environment according to the Tablet and check if things are in order or not. When you are ready press "Done" and see did you get the answers right.

You can find the Gas Detector and the Radio in the InGameMenu.

PLAYING IN MOBILE

Move by using the round joystick controllers. Move the inner circle to the desired direction. Left side joystick changes the eye direction. Move around by using the right side joystick. Crouch and get back up by pushing the middle button.

You can spin and zoom the character when checking the equipment.
